ACEs Aware will continue to publish updates to screening and training data on a quarterly basis. For the quarter ending October 2022, 12,100 Medi-Cal clinicians completed the core ACEs Aware training, including approximately 12,100 Medi-Cal clinicians who were enrolled with a single plan in any continuous 12-month period between January 1, 2020 and December 31, 2021 (and were not dually enrolled with a single plan). This number is recorded to the nearest 10 and may not sum to the total.

The methodology has been revised to count unique Medi-Cal clinicians and thus is not comparable to prior quarterly reports.

Data from: January 1, 2020 to December 31, 2021

**Notes:**
- “Medi-Cal Enrollment” is the count of distinct non-dual individuals who were enrolled in a single plan for any 12 continuous months during the measurement period.
- “Number of Beneficiaries Screened” is the count of distinct non-dual individuals screened, and screening rates and quality improvement metrics for Medi-Cal MCPs.
- The screens in this report are collected by capturing claims utilizing the designated G9919 and G9920 codes for ACE screenings. Any additional screenings that were not documented with these codes would not be counted in this report.
