Quarterly Progress Report
ACE Screening and Circuits Training Data

California Surgeon General are leading ACEs Aware, a first-in-the-nation, statewide effort to implement screening for Adverse Childhood Experiences (ACEs) and toxic stress. Since the launch of the California ACEs Aware initiative in May 2019, more than 80% of California clinicians have been trained in ACEs screening and patient care.

This quarterly progress report provides the following data:

- Number of screenings conducted
- Number of unique Medi-Cal clinicians
- Number of Medi-Cal members screened
- Number of Medi-Cal members

Number of people who completed the ACEs Aware Training and Certification:

- 25,389 people trained
- 14,332 people certified

Number of Medi-Cal clinicians who have completed the ACEs Aware Training and Certification:

- 13,080 clinicians have completed the training

ACEs Aware is making a difference in clinical care.

All its members ages 0 to 20, 5% of whom had an ACE score of four or greater, indicating a high risk for toxic stress.

The percentage of patients who disclosed an ACE score of four or greater varied by Medi-Cal MCP (January 1, 2020, to December 31, 2022).

The methodology has been revised to count unique Medi-Cal clinicians and Medi-Cal payment. The methodology has been revised to count unique Medi-Cal clinicians and Medi-Cal payment. The percentage of Medi-Cal Population Screened is rounded to the nearest whole percent.

Number of Medi-Cal members screened 1,390,300.

Number of unique Medi-Cal clinicians 6,049.

Number of Medi-Cal members ages 21 to 64 screened for ACEs, 26,879.

Number of Medi-Cal members ages 21 to 64 who were at risk for toxic stress.

An ACE score of four or greater was disclosed by 4% of adults ages 21 to 64 screened for ACEs.

The information in this table.

ACEs Aware is making a difference in clinical care.

All its members ages 0 to 20, 5% of whom had an ACE score of four or greater, indicating a high risk for toxic stress.
