

Trauma-Informed Primary Care (TIPC) Implementation Advisory Committee

October 10, 2023

Agenda

10:00 – 10:05 AM

- Introduction & Meeting Objectives
- *Emily Williams, CEO, UCLA-UCSF ACEs Aware Family Resilience Network (UCAAN)*

10:55 – 11:05 AM

Q&A

10:05 – 10:20 AM

- Updates from the Office of the California Surgeon General (CA-OSG)
- *Julie Rooney, Director of Communications, OSG*
 - *Camellia Mortezaadeh, Director of Strategy and Insights, Civilian*
 - *Travis Kushner, Account Director, Civilian*

11:05 – 11:15 AM

- Partner Spotlight
- *Brent Sugimoto, Secretary/Treasurer of the Board of Directors, California Academy of Family Physicians*

10:20 – 10:25 AM

- Updates from the California Department of Health Care Services (DHCS)
- *Dr. Karen Mark, Medical Director, DHCS*

11:15 – 11:30 AM

- Clinical Outreach and Engagement Discussion
- *Dr. Shannon Thyne, UCAAN Co-Principal Investigator*

10:25 – 10:55 AM

- UCAAN Updates
- *Emily Williams, CEO, UCLA-UCSF ACEs Aware Family Resilience Network (UCAAN)*
 - *Dr. Mikah Owen, UCAAN Co-Principal Investigator*
 - *Dr. Edward Machtinger, UCAAN Co-Principal Investigator*
 - *Dr. Eric Fein, Director of Outpatient Pediatrics Quality Improvement, Harbor-UCLA Medical Center*

11:30 – 11:45 AM

- Education and Training Discussion
- *Aaron Norr, UCAAN Director of Education & Training*

11:45 – 11:55 AM

Public Comment

11:55 AM – 11:59 AM

Next Steps

12:00 PM

Adjourn

ACES AND TOXIC STRESS CAMPAIGN

Progress Report

- **\$24M allocated through Children and Youth Behavioral Health Initiative**
- **Civilian awarded contract Spring 2023**

DHCS Updates

Topics

- Centering ACEs Aware in DHCS' Quality and Health Equity Division
- ACEs Aware Screening and Training Data
- Aligning Round 4 Grants with Training Providers on Enhanced Care Management Services for Youth

ACEs Aware Team Members in DHCS' Quality and Health Equity Division

By the Numbers: Screening

Medi-Cal Claims for ACE Screenings

Medi-Cal clinicians conducted more than
2,040,870
ACE screenings of
1,390,300
unique Medi-Cal members.

Of the **1,135,170** unique Medi-Cal members
ages 0 to 20 screened for ACEs,
5% had an ACE score of 4 or more.
Of the **255,130** unique Medi-Cal members
ages 21 to 64 screened for ACEs, **15%** had an
ACE score of 4 or more.*

Data from: January 1, 2020, to December 31, 2022

UCAAN Updates

PRACTICE Learning Collaborative

PRACTICE Goal, Aims, and Participants

Preventing and Responding to ACE-Associated Health Conditions and Toxic Stress in Clinics through Community Engagement

Goal: Increase the resources available to primary care clinics (PCP) and community-based organizations (CBO) to effectively address ACEs, toxic stress, and health disparities

Aims:

- Strengthen partnerships between primary care clinics and CBOs
- Increase services that can be sustained using existing or newly available sources of funding
- Increase workforce that can be sustained using existing or newly available sources of funding

25 multi-sector grantee teams (from 15 California counties):

- Learning Collaborative kicked off in October 2022, after a competitive application process in which more than 45 lead organizations applied
- Learning Collaborative to end in January 2024

PRACTICE Partnership Team

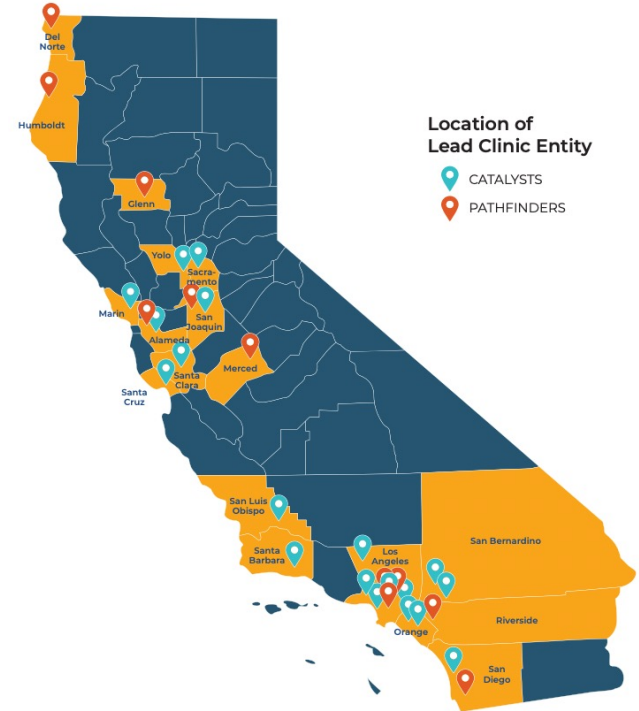

Each team includes a clinic or PCP provider organization (“lead”), a CBO, and a Medi-Cal managed care plan.

- Clinic Composition: 17 FQHCs, 8 PCP provider organizations
- CBOs: Most teams have more than one CBO they are partnered with— 64 CBOs participate
- Medi-Cal Managed Care: 14 public and commercial plans participate
 - Health Net has the largest number of teams (5 teams)
 - Inland Empire Health Plan, Partnership HealthPlan and L.A. Care each have 3 teams

Teams are informally assigned into two cohorts:

- Pathfinder (early stage): 9
- Catalyst (mid-stage): 16

Pathfinder grants are typically \$500,000 and catalyst grants are typically \$1 million.

PRACTICE Activities

Virtual Learning Collaborative Events:

- Two 90-minute learning sessions per month (one required and one optional)
 - Average attendance at required events: 173 participants
 - Average attendance at optional events: 131 participants
- Quarterly three-hour convening (hosted in lieu of the 90-minute required event those months)

Coaching: Each team is assigned a coach and has at least one monthly call. Calls are used to identify barriers and challenges, provide technical assistance and subject matter expertise, problem solve, discuss progress and priorities.

Technical Assistance: PRACTICE includes an array of subject matter experts to provide 1:1 support to teams, offer group coaching, inform the PRACTICE curriculum, and advise on overall project direction and goals.

Pop-Up Events: As the need arises, PRACTICE designs one-time events for teams to join.

Resource Hub: Relevant policy and implementation materials for teams to access asynchronously.

PRACTICE Strategies

PRACTICE Strategies Have Evolved

- PRACTICE is focused on enabling clinics to connect children and families to services and supports to address ACEs, ACE-associated health conditions, and toxic stress.
- Services and workforce include Enhanced Care Management (ECM), non-specialty mental health (e.g., dyadic therapy, family therapy), community health workers (CHW), doulas, and specialty mental health.
- Teams will develop sustainable approaches to connect patients to these services by the:
 - Implementation of the service/workforce by the clinic
 - Implementation of the service/workforce by the CBO
 - Creation of a close referral relationship or colocation of services

Early on, participants focused on planning for implementation

Developing Services

- Training and credentialing staff
- Refining workflows
- Compiling inventories of currently available services/resources
- Solidifying partnerships
- Conducting gap analyses

Expanding Workforce

- Developing job descriptions
- Searching for candidates
- Filling grant management roles
- Filling service provision roles

Clinical Outreach and Engagement

ACEs Aware Clinical Implementation Pilot Program

The ACEs Aware Clinical Implementation Pilot Program

Background

Adverse Childhood Experiences (ACEs) are a preventable root cause of numerous health conditions and social challenges. In California, 62 percent of adults have experienced at least one ACE, and 16 percent have experienced four or more ACEs. Among Californians enrolled in Medi-Cal, 89 percent report that they have at least one ACE, and 23 percent have four or more ACEs. Identification of exposure to ACEs and other risk factors for toxic stress – through universal and routine ACE screening – helps clinicians provide more effective, equitable, specific, and high-quality health care.

The ACEs Aware initiative offers Medi-Cal providers training, screening tools, clinical protocols, and payment for screening children and adults for ACEs. Screening for ACEs, assessing for toxic stress, and responding with evidence-based interventions can significantly improve the health and well-being of individuals and families.

The purpose of the ACEs Aware Clinical Implementation Pilot Program is to help California Medi-Cal providers overcome barriers to implementing and sustaining an ACE screening and response initiative in their clinic.

Eligibility

To be eligible for the ACEs Aware Clinical Implementation Pilot Program, applicant organizations must meet the following requirements:

- Be a clinical service provider located in California.
- At least 25 percent of patient/client population of the clinic must be enrolled in Medi-Cal.
- Is not currently screening for ACEs or screens less than 25 percent of patient/client population for ACEs.

Additionally, organizations that receive an ACEs Aware Clinical Implementation Pilot Program award will commit to:

- Ensuring all clinical staff complete the Becoming ACEs Aware in California core training and attest to completion (as appropriate).
- Forming an ACE screening and response implementation team.
- Attending three virtual meetings with the ACEs Aware technical assistance team (before, midway, and at the end of the grant period, which begins when the organization receives funds).
- Launching an ACE screening and response pilot within three months of receiving the award.
- Submitting a final report.

ACEs Aware Clinical Implementation Pilot Program

Timeline

The implementation period will be nine months, with the start of the funds are received.

Payment

Payment amount will be based on the clinic's number of patients screened for Medi-Cal payment for ACE screening.

Payment rates can be found at:

www.acesaware.org/learn-about-screening/billing-providers/

Eligible Providers*	Funding Amount
1-100 providers	\$5,000
101-250 providers	\$10,000
251+ providers	\$15,000

Organizations with multiple clinics are encouraged to submit one application, instead of each clinic applying for additional funding for health systems with multiple locations and more than 10 providers will be considered. Exceptions must be justified.

The ACEs Aware Clinical Implementation Pilot Program will be accepted on a rolling basis.

Application Process

Applicants must complete the online application form at: <https://test.com/b/form/1-c-42f856-df644e0b3a5a7a6e73403d>.

The application process can be submitted to questions@acesaware.org.

Technical Assistance

Contact Us

We are here to help! Please use the form below to submit any questions you have about the ACES Aware initiative.

Technical Assistance. Health care teams are invited to use the form to request technical assistance to implement ACE screening and response.

If you are requesting support for the Becoming ACES Aware in California training, please use the [support form on our learning management system](#).

Please fill out the form below and a member of our team will respond back soon.

Clinical Outreach Efforts

Discussion:

How do we achieve buy-in
from clinics that are not
currently screening for ACEs?

Education and Training Updates

Guiding Principles

- Address education and training gaps throughout the entire ACE screening and response continuum
- Use data-driven approach
- Broaden scope to address the needs of an expanding of Medi-Cal workforce
- Incorporate best practices based on emerging science within translational framework
- Align with CalAIM

Expansion of ACEs Aware Training Efforts

- Broad effort from Medi-Cal workforce is required to meaningfully prevent, identify, and respond to the impacts of ACEs and toxic stress
- Providers eligible to screen for ACEs include more than physicians
- All healthcare team members are essential
- Core training is not sufficient for scaled implementation and buy-in

Expansion of E-Learning Courses

- Organizational implementation
- Clinical response
- Taking care of the healthcare team

Stress Busters: Clinical Strategies for Preventing and Mitigating Toxic Stress

The diagram is a circular infographic with 'STRESS BUSTERS' in the center. It consists of eight segments, each with an icon and a label: 1. A blue circle with a person icon labeled 'SUPPORTIVE RELATIONSHIPS'. 2. A blue circle with a clock icon labeled 'QUALITY SLEEP'. 3. A purple circle with an apple icon labeled 'BALANCED NUTRITION'. 4. A purple circle with a person running icon labeled 'PHYSICAL ACTIVITY'. 5. An orange circle with a lotus flower icon labeled 'MINDFULNESS PRACTICES'. 6. A green circle with a tree icon labeled 'EXPERIENCING NATURE'. 7. A green circle with a heart and person icon labeled 'MENTAL HEALTHCARE'. 8. A blue circle with a person icon labeled 'SUPPORTIVE RELATIONSHIPS'.

Live Trainings (Webinars)

- 16 webinars scheduled for 2023
- More than 1,500 live attendees to date
- Webinar Series:
 - Implementation with Intention
 - Science and Innovation Speaker Series
 - Community Spotlight
 - ACEs and Reproductive and Sexual Health

Reproductive Health Series

- Proof of concept for webinar special series as a strategy to expand
- Co-developing content with Subject Matter Experts and providers on the ground
- ~1200 registrants to date
- 670 live attendees to date
- ~ 40% of registrants for the first webinar had not previously completed *Becoming ACEs Aware in California*

Science and Innovation Speaker Series

Webinar Series

SCIENCE AND INNOVATION SPEAKER SERIES

The new ACEs Aware Science and Innovation Speaker Series provides a forum for discussing the emerging science of toxic stress, ACEs, and other early life adversities, as well as resilience and strength-based factors within a foundation of equity. The series highlights cutting-edge researchers and innovators in the field who have published evidence-based, community-engaged, and data-driven studies.

Adverse Childhood Experiences, Outcomes, and Interventions
Rachel Gilgoff, MD
Thursday | October 12, 2023 | 12:30-1:30 pm

Future Training Directions

- Continue to identify special series live training topics
 - School-based health centers
 - Mental health
 - ACE screening and response across the lifespan
- Work with partner organizations to continually identify training gaps relevant to target populations
- Updated ACEs Aware Learning Center will provide greater customizability and advanced analytical capabilities
- Evaluate and identify opportunities to improve core *Becoming ACEs Aware in California* training to address the needs of an expanding Medi-Cal workforce

Discussion:

How do we build a healthcare workforce that is “ACEs Aware”?
